

Design & Structure

- Available in single-walled or double-walled construction for strength.
- Ventilation holes to prevent moisture buildup and spoilage.
- Inner plastic liners to retain humidity and prevent dehydration.
- Can be printed with branding, barcodes, and handling instructions.

Advantages

- **Lightweight & Cost-Effective:** Reduces transportation costs.
- **Eco-Friendly:** 100% recyclable and biodegradable.
- **Customizable:** Available in various sizes and branding options.
- **Stackable:** Optimizes storage and transport space.

Corrugated Cardboard Boxes

Corrugated cardboard boxes are widely used for onion packaging due to their lightweight, cost-effectiveness, and customizability.

Recommended Box Sizes

- For Small Onions: 5–10 kg capacity boxes.
- For Big Onions: 10–20 kg capacity boxes.

Features

- Made from High-Density Polyethylene (HDPE) or Polypropylene (PP).
- Ventilated sides and base for airflow and ripening control.
- Stackable and nestable to save space.
- Available with handles or grips for easy carrying.

Advantages

- Durable & Reusable: Suitable for multiple uses.
- Better Ventilation: Reduces spoilage by enhancing airflow.
- Strong Structure: Prevents crushing during transport.

Plastic Crates

Plastic crates offer a durable and reusable packaging solution, particularly for short-distance transportation and local markets.

Recommended Box Sizes

- For Small Onions: 10–15 kg capacity crates.
- For Big Onions: 15–25 kg capacity crates.

Features

- Made from pine, plywood, or hardwood.
- Slatted sides for proper ventilation.
- Reinforced corners for stacking strength.
- Handles or cutouts for easy handling.

Advantages

- Strong & Rigid: Protects onions from physical damage.
- Eco-Friendly: 100% biodegradable and reusable.
- Ideal for Long-Distance Transport: Ensures onions remain fresh.
- Stackable & Customizable: Can be resized or branded.
